BIODELICS IMMERSION

Your Retreat Calendar

November 12th - November 19th, 2022

Your body is a doorway into a deeper dimension of healing magic...

Biodelics is a cutting edge new approach to healing, wellness, embodiment, awakening and wisdom that includes psychedelics as a category, but whose primary focus is on the ways our body naturally opens into magical states of embodied visionary consciousness, that new science confirms can profoundly heal us. Biodelics roots us back into our birthright - the inherent magic within our bodies; from the way the molecules of plants activate our innate neuro-endocrine alchemy, to breathwork switching on our inner hormonal pharmacopeia, to relational synchrony and elemental alchemy awakening our stem cells and mitochondria, to the terrestrial and celestial cycles time weaving our body rhythms.
